YUKON BUREAU OF STATISTICS

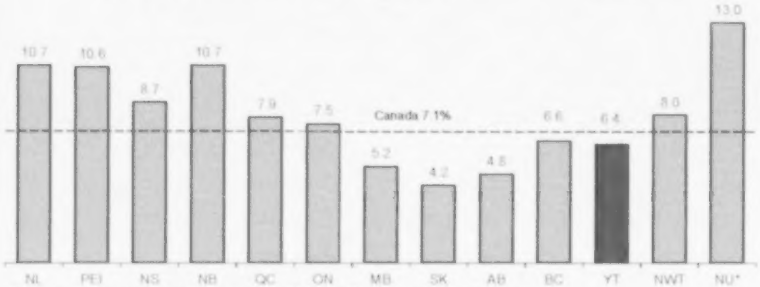
Yukon Employment

August 2013

Highlights:

- Yukon's August 2013 unemployment rate was 6.4%, an increase of 1.0 percentage point compared to July 2013.
- Compared to July 2013, Yukon's labour force decreased by 100, the number of employed decreased by 200 and the number of unemployed increased by 200.

Unemployment Rate, Provinces and Territories, August 2013



*Nunavut's unemployment rate is available only as an unadjusted estimate.

- Nationally, comparing August 2013 to July 2013 figures, there was a slight increase in both the labour force (0.2%) and the number of employed (0.3%).
- The number of unemployed in Canada decreased by 1.3% resulting in a decrease in the unemployment rate of 0.1 percentage point to 7.1%.

Note: Throughout this publication, rounded data may not sum to totals.

August 2013 Yukon Employment at a Glance

Labour force	20,400
Employed	19,200
Unemployed	1,300

Seasonally adjusted refers to the technique of adjusting figures to remove seasonal movements. As such, seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see definitions on page 8.

Unadjusted figures are available on page 5.

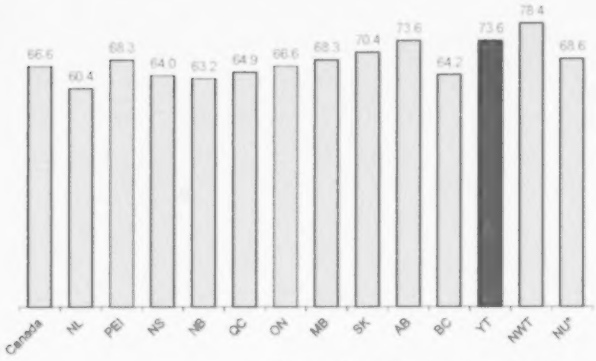
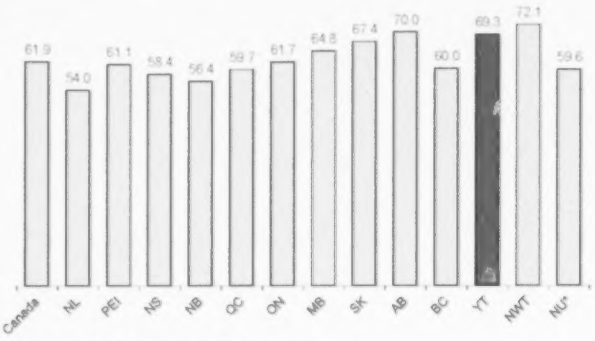
Comparisons with Canada - Snapshot

Participation Rate, August 2013



Employment Rate, August 2013



*Nunavut's participation rate and employment rate are available only as unadjusted estimates.

The participation rate measures the percent of the population which is working or actively looking for work. Yukon's participation rate in August 2013 was 73.6%, tied with Alberta for second-highest in Canada.

Yukon's August employment rate (the percent of the population which is employed), at 69.3%, is the third-highest in Canada.

Comparisons with Canada - Historical

The Labour Force Survey estimates that 73.6% of Yukoners aged 15 and over were employed or were seeking employment in August.

Yukon's participation rate in August (73.6%) is 0.8 percentage points higher than January of this year. January's participation rate of 72.8% was the lowest since December of 2010.

The August 2013 employment rate of 69.3%, is down 1.0 percentage point from July, and down 2.6 percentage points compared to August 2012 (71.9%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's; however, as is often the case with a small population base, our rates show a higher degree of volatility.

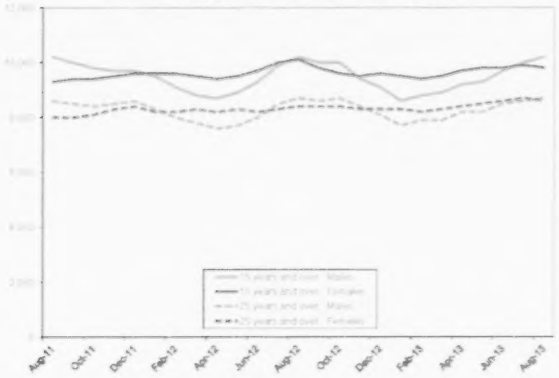
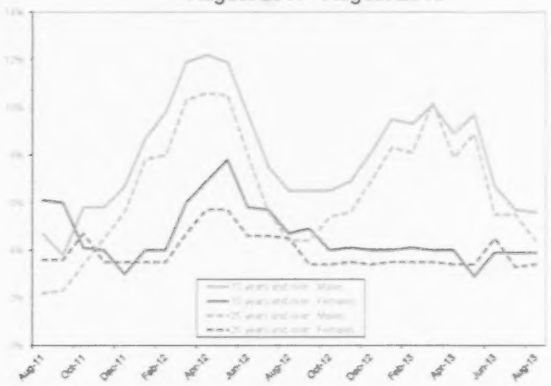
Employment by Age and Sex,
August 2011 - August 2013



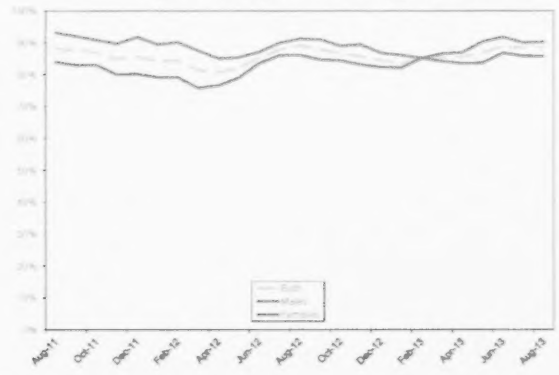
Unemployment Rate by Age and Sex,
August 2011 - August 2013



- Comparing August 2013 to July 2013, the unemployment rate for males aged 15+ decreased from 5.7% to 5.6% and the rate for males aged 25+ decreased from 5.5% to 4.4%. The rate for females aged 15+ remained unchanged at 3.9%, while for females aged 25+ it increased from 3.3% to 3.4%.
- Yukon's youth unemployment rate (aged 15-24) has been consistently over 10% since March of 2011, with the exceptions of April (8.0%) and June (7.4%) of 2013 . The rate for August 2013 was 10.0%.

Employment, *Unadjusted,* by Full-time/Part-time, August 2013

Full-time employment as a % of all employment
Age 15+, August 2011 - August 2013



- 17,700, or 88.5%, of Yukon's workers aged 15+ were employed full-time in August 2013. This was the third-highest among all other jurisdictions following Northwest Territories (91.5%) and Nunavut (89.2%).
- Nationally, 83.3% of employed Canadians worked full-time in August.
- 90.2% of employed Yukon males worked full-time, while 85.7% of females did.
- When comparing August 2013 to July 2013, full-time employment increased by 100.

Employment, *Unadjusted,* by Industry, August 2013

	Both sexes	Males	Females
Total employed	20,000	10,200	9,800
Goods-producing sector	3,200	2,900	400
Forestry, fishing, mining, oil and gas	700	600	x
Construction	1,800	1,700	200
Services-producing sector	16,700	7,300	9,400
Trade	2,100	1,200	900
Transportation and warehousing	800	600	x
Finance, insurance, real estate and leasing	800	300	400
Professional, scientific and technical services	1,200	400	800
Business, building and other support services	700	400	300
Educational services	1,400	400	1,000
Health care and social assistance	2,500	400	2,100
Information, culture and recreation	1,100	600	500
Accommodation and food services	1,300	600	600
Other services	600	400	200
Public administration	4,200	1,800	2,400

x = suppressed for confidentiality
Note: The sum of industry rows shown does not equal sector totals as industries with fewer than 500 workers are not shown.

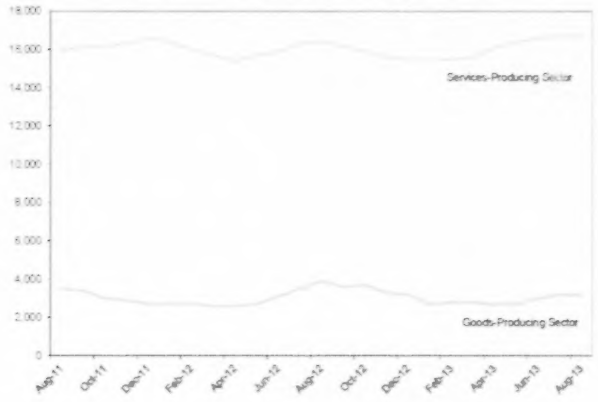
- In August 2013, 16,700, or 83.5% of working Yukoners were employed in the services-producing sector; 3,200, or 16.0% were employed in the goods-producing sector.
- 56.3% of Yukoners working in the goods-producing sector had jobs in the construction industry.
- While females accounted for 56.3% of workers in Yukon's services-producing sector, only 12.5% of goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes those industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector are industries primarily in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, Employment, August 2011 - August 2013



- In August 2013, employment in the the goods-producing sector (3,200) was the same as in July 2013. Employment in the services-producing sector remained at a record high level for the second consecutive month at 16,700.
- Comparing August 2013 to August 2012, employment in the goods-producing sector decreased by 700, or 17.9%, while employment in the services-producing sector increased by 300, or 1.8%.

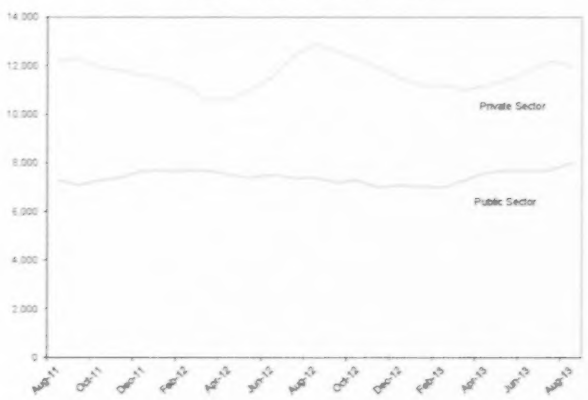
Public and Private Sectors, *Unadjusted,* August 2013

	Both sexes	Males	Females
Total Employed	20,000	10,200	9,800
Public employees	8,000	3,200	4,800
Total private sector	12,000	7,000	5,000
Private employees	9,000	4,900	4,100
Self-employed	3,000	2,100	900

Note: 'Public employees' includes federal, territorial, First Nation and municipal employees.

- In August 2013, 40.0% of working Yukoners were employed by one of the four levels of government in the territory.
- Of the private sector, 25.0% were self-employed.
- Private sector employment was down by 900, or 7.0%, from August 2012, while public sector employment increased by 600, or 8.1%.

Public/Private Sector Employment, August 2011 - August 2013



Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as "employment/population ratio," it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April's unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories' figures are not included in the calculation of Canada's numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
